

CombiVac Bags

The latest technology in vacuum bags is now available in the US!

CombiVac **'Performance'** series incorporates new technology in vacuum bags. This recyclable **2mil/50u film** delivers all the benefits of our Preserve & Pure products with additional features.

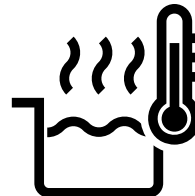

Oven safe to 400°

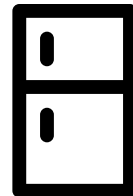

Microwave safe – includes a self venting system

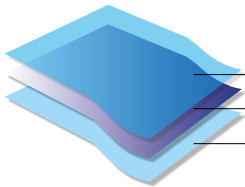

Boiling water safe

Blast chilled to -20°

Easy open lip for the placement of products

HEAT SEALABLE Copolymer
PET Homopolymer
CORONA treatment

CombiVac Performance bag series are made for **any chamber vacuum sealer** and for use in commercial foodservice/production operations. These bags are ideal for storage, extending shelf life, portion control, safe delivery & grab'n'go meals. Temperature holding range from -20° to 400°. Oven & microwave safe.

All our bags are **BPA-free and FDA approved.**

The 'Performance' allows you to elevate your meal & grab'n'go programs. Increase your efficiency & save cost by packaging meals/snacks once a week, **seal in the freshness & extend the shelf life.**

Innovative solution for customers, students, guests & patients – reheat & serve on site or at home. Meal kits can **easily be refrigerated or frozen for later use.**

Tamperproof and date stamped for safe & secure packaging!

Custom sizes & design available.

The Performance series include a **recyclable technology and a new self-venting system.** The self-venting technology allows excess steam to be released without damaging the film or product during heating.

CombiVac Bags

The latest technology in vacuum bags is now available in the US!

Lip for easy opening of bag

Self venting ports. Releases excess steam so bag does not burst during retherm

Seal can be added to make 2 compartments
